

Dear Concerned Friend,

O.K, you've been dealing with this long enough. . .

The constant urge to urinate, the dribbling. . . *and*, then there's the difficulty with your ability to perform sexually.

You thought this would all pass quickly, but now it *seems* like you're just going to have to get used to it.

But don't give up just yet. There's hope for you.

I've helped hundreds of other men suffering from prostate and urinary problems. . . as well as problems related to sexual impotency.

They come into the office with their heads hung low, looking defeated. . . and in a short time they feel like men again – sometimes in as little as 14 days or less.

The same can happen for you. And you don't even need to come to my office. . . because what has helped these men is my breakthrough formula ***Prostera with Pomegranate***. . . which is easy for you to get your hands on.

Have you faced any of these recurring symptoms?

- Nighttime bathroom trips
- Straining to start or stop urinating
- Urgent or painful urination
- Hesitancy, dribbling, or a weak urinary stream
- Low libido or sex drive
- Trouble getting or maintaining an erection

To suffer from any one of these problems can make you feel like your headed downhill fast. But the good news is that by using ***Prostera with Pomegranate*** you can shake off these frustrating issues, just as many other men have done.

This is because ***Prostera*** is a high potency formula. . . It's 3,000 times stronger than saw palmetto, and has high levels of **beta-sitosterol**, which respected medical journals reveal is the most powerful nutrient for maintaining a healthy prostate.

And the research bears this out. . . In one study, 200 men took either beta-sitosterol or a placebo. Six months later, it was those who took the beta-sitosterol that had made significant improvement with their symptoms and urinary flow.

With the addition of pomegranate, ***Prostera*** is even stronger, because it gives you the support your heart and immune system need to maintain your strength as a man.

Something that saddens me as a physician is to see the number of people who choose to live with problems that they could do away with. Too many men, especially, think they can take care of their health problems by simply hoping they will go away on their own.

But haven't you already waited long enough, when there's a simple and effective way to remedy your frustrating symptoms?

Join the many other men who have already found quick relief from their prostate and urinary problems.

Request your No-Risk Trial Supply of ***Prostera*** Today.

For Your Best Health,

Dr. Jim

P.S. No matter how long you have been having difficulties in this area, it's been too long. Try ***Prostera*** and start feeling like a man again.
